Can you find the five differences?
The Little Blue Engine is trying to get the toys and games to the children on the other side of the hill! Draw a line through the maze to help her find her way.
CREATE YOUR OWN CONDUCTOR HAT!

What you’ll need: Crayons, markers, or colored pencils • Scissors • Tape or glue

Instructions:
1. Color in your conductor hat with your own design! Don’t forget to color in the straps!
2. With the help of an adult, cut along the thick black line of the hat, brim, and additional straps
3. Tape or glue the curved side of the brim to the back of the hat strap.
4. Tape or glue the additional straps to either end of the hat, if needed. This will keep the hat secure around your head.
5. If using glue, wait for it to dry before putting it on. Once it’s ready to be worn, say to yourself “I Think I Can!” because The Little Engine That Could can do anything she sets her mind to!
